In another column of the DEMOCRAT will be found the result of all the late elections of this county, prepared by us for publication from the official returns, as they were handed into the Prothonotary's office. Upon examination of the lamp with the improvement the good qualities of the invention are readily perceived and admitted to be practical and beneficial.

That Peter Herdic, Samuel Josephs, and George Ramsdale be appointed commissioners to ascertain and locate the boundaries of said city; and that the said city be subjected to the several pro-visions and conditions of the present charter of Williamsport

This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous confitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders

Scrofula, or King's Evil.

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered or unhealthy food, impure air, flith and filthy habits, the depressing vices, and, above all, by the venercal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to childres unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the

stand the attacks of other diseases; consequently, vast numbers perish by disorders which, although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exescise. Such a medicine we supply in

Compound Extract of Sarsaparilla. the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fatal malady. It is combined from the most active remedials that havabeen discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Mence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as Enuvrivs and Skin Diracess, St. Anthony's Fire, Rose, or Enverences, Pinples, Pustules, Blotches, Blains and Boils, Turons, Title and Salt Rheum, Scald Head, Rhowers, Rheumatism, Syphilitic and Mercunial Dy. and Salt Rheum, Scald Head, Ringword, Rheumatism, Stphillitic and Memocrial Dr. Mases, Dropsy, Dyspepsia, Deblity, and, indeed, all Complaints arising from Vittated on Impurity of the blood. The popular belief in "impurity of the blood" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsaparilla is to purify and regenerate this vital fluid, without which sound health is impossible in co. "arrinated constitutions."

FOR ALL THE PURPOSES OF A FAMILY PHYSIO, are so composed that disease within the range of their sction can rarely withstand or evade them Their penetrating properties search, and cleame, and invigorate every portion of the human organism, correcting its desared action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting.

Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish gratis my American Almanac, containing certificates of their cures and directions for their use in the following complaints: Coxitice mass, Heartburn, Healache arising from disordered Stomach, Nausea, Indiquation, Pain in and Morbid Inaction of the Bowels, Flatulancy, Loss of Appatits, Jaundice, and other kindred complaints, arising from a low state of the body or obstruction of its functions.

FOR THE BAPID CURE OF Coughs, Colds, Influenza, Hoarseness, Croup, Bronchitis, Incipient Consumption, and for the relief of Consumptive Patients in advanced stages of the disease.

So wide is the field of its usefulness and so nuowide is the acta of its userumers and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use. When once tried, its superiority over every other medicine of its kind is too apparent to escene other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
